

ChemIndustrial BLEND INGREDIENT questionnaire

Instructions: Complete a separate Blend Ingredient Questionnaire for each blend ingredient. Complete one Blend System Configuration questionnaire for the whole system. See <u>on-line examples</u> of completed forms. Need help with this questionnaire? Call, fax or e-mail us using the contact information at the bottom of this page.				
Customer name:				
Customer project name:				
Prepared by: Fax or e-mail address:				
Name of ingredient: (use a variable if process secrecy is required)				
Ingredient characteristics: (circle as many as needed) (Add more as needed)				
	Liquid	Gas	Slurry	
	Aqueous solution	Acid	Base	Organic solvent
	Food Ingredient	Lubricant	Fuel	Cleaning Agent
Temperature range: Minimum: = ° Normal = ° Maximum = ° °F or °C				
Ingredient viscosity (provide value if known): Or is like (describe by marking scale):Water.....Motor Oil.....Molasses.....				
Ingredient density or specific gravity:				
Ingredient proportion in blend: Minimum: = % Normal = % Maximum = %				
Ingredient flow rate in blend: Minimum: = Normal = Maximum = Units				
Source of ingredient:				
	Existing tank	Tote	Drum	Plant pipework
	New tank	Other (describe below)		
Other Notes:
